Greener Solutions

At Cook County Lumber, we are committed to taking an environmentally responsible position on the products we distribute.

Collins was the first privately owned forest products company in the United States to be comprehensively evaluated and independently certified by SCS under the principles and criteria of the Forest Stewardship Council (FSC).

BluWood is the name given a family of wood frame building components with a factory applied, proprietary two-part coating technology designed to protect the superstructure of a wood frame building from the damaging effects attributed to mold fungus growth; rot fungi and wood ingesting insects; while also limiting moisture absorption.

FSC Certified Roseburg RigidLam LVL is an EWP laminated veneer lumber that is part of the Roseburg Framing System. Depending on the application, it can contribute to achieving LEED credits.

CertainTeed FiberCement contains more than 30% pre-consumer recycled material which contributes directly to LEED and NAHB project certification in the Materials and Resources and Resource Efficiency categories.

Open Joist is an open-web, all-wood floor truss that uses less wood fiber than solid-sawn joists. This engineered floor truss takes advantage of the triangle's structural power and the forces of compression and tension to create strong support. Open Joist can help earn up to 4.5 points under the LEED for Homes green building certification system.

Fiber Composites, Horizons decking with PermaTech Innovation bonds HDPE composites with resilient surface material. Made of 75% recycled content, the decking is scratch- and stain-resistant, and comes in four colors with two choices of wood grain. Backed by a 20-year limited warranty, the decking is also designed to resist splinters, termites, mold, mildew, and decay.
